

The **Homeownership Module** in Tracking At-A-Glance® (TAAG) allows users to record financial information pertaining to a resident's qualification for homeownership.

TAAG tracks:

- Credit and asset information for the borrower and co-borrower
- Property details, such as property type and appraised value
- Loan details including lender and closing information
- Grant and tax credits

This module has been fully integrated into our interface, making every field available for reports.
