Here's my testimonial about what TAAG and the staff of Designing Success have done for Catholic Charities:

Before implementing Tracking-at-a-Glance (TAAG) in 2009, the separate programs in every corner of our agency all used separate data processes. The Designing Success staff created several new pages specifically custom-built to work for us, enabling us to implement the system across a wide array of programs. Their creativity and expertise in customizing the database and working with our particular needs was outstanding. This team stands head and shoulders above some other vendors we've worked with in the past, and they will always put the success of your programs first.

After assessing a pilot implementation of TAAG for our Refugee & Immigration Services programs, we decided to implement it state wide, and reports that previously took days can now be completed in a matter of hours.

In the years since we've implemented TAAG, we've used their system to unify our agency-wide reports to major donors. It has been an essential tool in tracking and reporting the work of our agency and in multiple years we've achieved increases in funding from some major community donors, which would not have been possible without TAAG!

Many thanks to you all for your creativity, expertise, and dedication!

Cheers,

Brendan McAdams
